

**DCF – 560M**  
**CompactFlash 56K Modem Card**

**Quick Installation Guide**

**Package Contents**

Please ensure that the following items are included in your package. If any items are missing, pls. contact your dealer:

- 1- DCF – 560M CompactFlash 56K Modem Card
- 1- Analog Phone Cable
- 1- User's manual
- 1- Quick Installation Guide
- 1- Registration card

## Hardware Installation

1. Firmly insert the DCF – 560M into the CompactFlash slot on top of your pocket PC with the 50-pin connector facing the CompactFlash slot. You will hear a click when firmly connected.
2. Please Press “YES” to skip the warning message.

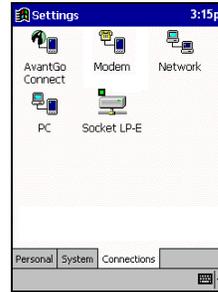

3. Connect the analog phone cable to RJ-11 of the DCF – 560M. And insert the other end of the analog phone cable into a standard telephone outlet.

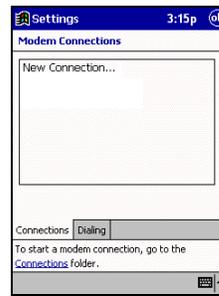

## Configuring a Modem Connection on Your Pocket PC

1. On your Pocket PC, tap the “**Start**” button and choose **Settings**.
2. Click the “**Connections**” tab and choose “**Modem**” icon.

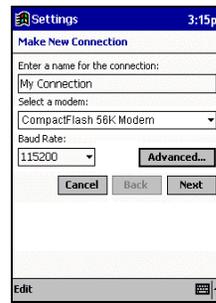

**Note:** Consult with your network administrator for specific settings.

3. Click “New Connection...”

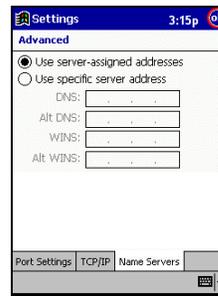

4. Type a name in the “Enter a name for the connection” text box.
5. Choose “CompactFlash 56K Modem” from the Select a modem list.
6. Choose “Baud Rate” for your CF modem.

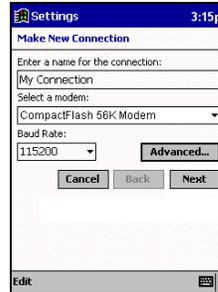

For example: **115200**.  
Click the “Advanced” button.

7. Click the “Name Servers” tab.
8. According to your ISP account, input appropriate address if necessary.
9. Click “OK” at top right to continue.

10. Click the “Next” button.

11. Type in your local ISP access number.
12. Click “Next” to continue.

The image shows a screenshot of a 'Settings' dialog box titled 'My Connection'. The dialog has a blue title bar with the text 'Settings' and '3:15p'. Below the title bar, the text 'My Connection' is displayed. There are three input fields: 'Country code:' with the value '1', 'Area code:' with the value '888', and 'Phone number:' with the value '1234567'. Below the input fields are three buttons: 'Cancel', 'Back', and 'Next'. At the bottom left of the dialog, there is an 'Edit' button with a small icon to its right.

13. Click **Finish** to complete the process...

## Setting up your Pocket PC for POP3 Email

1. Launch the “**Inbox**” from your Pocket PC. Click “**Services**”, followed by **New Service** from the menu. Then Click “**Next**”

The screenshot shows a mobile application interface for setting up an email service. At the top, it says "Inbox" with a signal strength icon and the time "4:08p". Below that is a "Service Name" section. Under "Service type:", there is a dropdown menu currently showing "POP3 Mail". Under "Service name:", there is a text input field containing "My Mail". At the bottom of the form area, there are three buttons: "Cancel", "Back", and "Next". At the very bottom of the screen, there is an "Edit" button with a small icon to its right.

2. In the Server Field, enter the incoming mail server (usually a POP3) and your User ID and Password. If you are having problems, please contact your ISP. Click "Next".

The screenshot shows a configuration window titled "POP3 Service (1/4)" with a time of 4:10p. It contains the following fields and controls:

- Connection: ISP Connection (dropdown menu)
- Server: mail.isp.com
- User ID: jasond
- Password: [masked with asterisks]
- Save password:
- Buttons: Cancel, Back, Next
- Footer: Edit X, [Help icon]

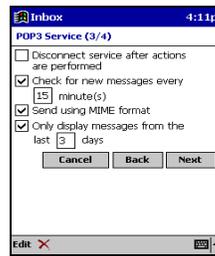

3. Leave the Domain name blank unless you are connecting to a Microsoft NT server. The SMTP server will usually be the same as your POP3 server but check with your ISP to make sure. The return address is the email you can be reached at. Click "Next".

The screenshot shows a configuration window titled "POP3 Service (2/4)" with a time of 4:11p. It contains the following fields and controls:

- Domain (Windows NT): [blank]
- SMTP host for sending mail: mail.isp.com
- Return address: jason@pocketpc.com
- Buttons: Cancel, Back, Next
- Footer: Edit X, [Help icon]

4. These are email options. Choose those options that you wish to use. Click “Next”.

The screenshot shows a dialog box titled "Inbox" with a time of "4:11p". Below the title bar, it says "POP3 Service (3/4)". The dialog contains the following options:

- Disconnect service after actions are performed
- Check for new messages every  minute(s)
- Send using MIME format
- Only display messages from the last  days

At the bottom of the dialog are three buttons: "Cancel", "Back", and "Next".

5. The last screen has options for email retrieval. You can select the options on how you view mail. If you choose “**Get Full Copy of Messages**”, you download the entire email. If you choose “**Get Message Headers Only**”, you download only the summary of the email. Choose the amount of lines you wish to download. If you use Microsoft Outlook, check “**Get Message Requests**” if you want to retrieve and respond to meeting requests. Check “**Get File Attachments**” if you wish to download file attachments. This may slowdown your download time.
