• Existing 10/100 Ethernet-based network
• A broadband Internet connection

DCS-2310L

Before You Begin

You must have an active mydlink.com account to use this camera. If you do not have an account, follow the steps under **Easy Setup (all other routers)** and the setup wizard will allow you to create a new account. Visit **www.mydlink.com** for more information.

If you have purchased an open box or resold unit, or if you experience issues registering this camera with your mydlink account, perform a hard reset by using an unfolded paperclip to press and hold the reset button on the back of the camera for 6 seconds while the camera is powered on. If you are returning the product to the place of purchase, please perform the hard reset procedure to clear the product of any personal data.

Installation

Zero Configuration Setup (with mydlink Cloud Router only)

*Note: The Zero Configuration Setup will only work with a registered Cloud Router and an active mydlink account. If you do not have a mydlink Cloud Router, please skip to the **Easy Setup** section.*

Step 1:
Connect the included Ethernet cable to the Ethernet port located on the back of the DCS-2310L and connect it to your router.

Step 2:
Attach the power supply to the power input located on the back of the DCS-2310L and connect it to a wall outlet or power strip. Power is confirmed when the Power LED is lit. Your Cloud Router will automatically assign your network settings to your camera.

Step 3:
From any computer, open a web browser, go to **http://www.mydlink.com** and log into your account. Once mydlink detects your camera, a notice will appear that there is a new device detected. Click on your camera from the **New Devices** list and then click **Yes** to add your camera.

Your setup is complete!

You can now unplug your camera and move it to the location of your choice. You may connect the camera to a Power over Ethernet (PoE) switch to eliminate using the power supply.

Easy Setup (all other routers)

Step 1:
Open a web browser and go to **http://www.mydlink.com/download**. Click your camera model and then under Wizard, click the link of the version (Windows or Mac) you want to download. Depending on your web browser, you may need to right-click the link and select **Save link as**. Once downloaded, do not launch the wizard until instructed.

Step 2:
Connect the included Ethernet cable to the Ethernet port located on the back of the DCS-2310L and attach it to your router.

Step 3:
Attach the power supply to the power input located on the back of the DCS-2310L and connect it to a wall outlet or power strip. Power is confirmed when the Power LED is lit.

Step 4:
Windows Users - Once the file is downloaded from Step 1, you will have to extract (unzip) the files. Right-click the file and select to extract the files. Once extracted, double-click autorun.exe to launch the setup wizard.

Mac Users - Once downloaded, double-click the file to launch the setup wizard.

Step 5:
Click on the **Start** button to start the wizard and follow the instructions from the Installation Wizard to finish setting up your camera.

Step 6:
Once the installation is finished, you can unplug your camera and move it to the location of your choice. You may connect the camera to a Power over Ethernet (PoE) switch to eliminate using the power supply.

mydlink Portal

After registering your DCS-2310L camera with mydlink, you will be able to remotely access your camera from the **www.mydlink.com** website. After signing in to your mydlink account, you will see a screen similar to the following:

Step 1:
Open Internet Explorer and go to **http://www.mydlink.com**, then sign into mydlink.

Step 2:
Select your camera from the device list, and your camera's Live View will appear.
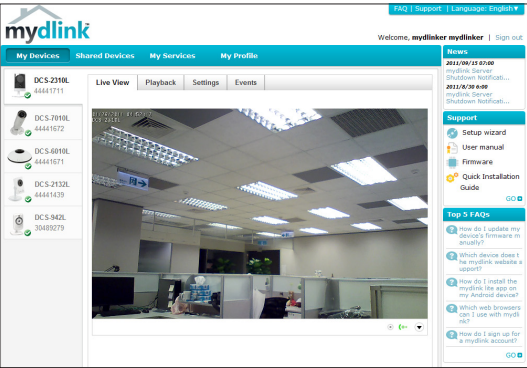

Technical Support

Having trouble installing your new product? D-Link's website contains the latest user documentation and software updates for D-Link products. U.S. and Canadian customers can contact D-Link Technical Support through our website or by phone.
