Setting Up Your Camera

- 1 Download the free mydlink Lite app on your smartphone or tablet by scanning the QR code below, or by searching for **mydlink Lite** in the app store for your device.

System Requirements: Refer to the mydlink Lite app page on Apple App Store, Google Play or Windows Phone Store.

- 2 Before launching the app, make sure your mobile device is connected to the Wi-Fi network (i.e., router) you want to connect the camera to.
- 3 Launch the mydlink Lite app, then create a new account or log in to your existing account. The app will guide you through the rest of the configuration process.

**Need help setting up your camera?
Watch the installation video.**

Visit dlinksetup.com

Note: If you experience issues registering this device with your mydlink account, or if you purchased an open box or resold unit, perform a hard reset by pressing and holding the reset button on the device for 10 seconds while the device is powered on. **If you are returning the device, please perform the hard reset procedure to clear the device of any personal data.**

To ensure your product has the latest security updates and operates at optimal performance, it is recommended you update your product to the latest firmware after installation and to periodically check for new firmware releases. Updates can be found by searching your model name at <http://support.dlink.com> or through the mydlink mobile apps for mydlink registered devices.

Mount the Camera

Step 1:

Rotate the baseplate counterclockwise and remove it.

Step 2:

Place the baseplate where you want to position the camera and use a pencil to mark the holes. You can use the lower holes for a removable installation, or the top holes for a fixed one. Make sure that the arrow on the baseplate is pointing up.

Step 3:

Depending on the material of the wall or ceiling, use proper tools to drill holes 25mm deep with a 6mm drill bit where you marked. If the wall is made out of concrete, drill the holes first, then insert the plastic anchors to support the screws.

Step 4:

Place the baseplate over the holes that are in the wall or ceiling. Make sure to align the baseplate holes with the holes in the wall or ceiling. Use the supplied screws to attach the baseplate to the surface of the wall or ceiling.

Step 5:

Place the camera over the baseplate with the alignment tab pointing left, then attach the camera by rotating it until the alignment tab points up.

Step 6:

Adjust the angle and rotation of the camera as desired. You can also rotate the camera on the baseplate about 45° to the right or left.

FAQs

1. What is a mydlink No.? What is it used for?

Each camera has a unique eight-digit mydlink No. which will be shown on the label on the bottom of your camera. This eight-digit number identifies your device, and is required to add your device to your mydlink account.

2. What can I do if my DCS-2530L is not working correctly?

- Reset the camera (see next step) and run the setup steps starting on page 4 again.
- To make sure your hardware is installed correctly, make sure that:
 - the Power/Status LED on the back of the camera is solid green
 - your Internet connection is working
 - your router's LAN & WAN connections are working
 - your router supports UPnP®
 - your camera is on the same network as your mobile device
 - both your mobile device and camera have a working Internet connection
- If your camera is still not working, check your router and make sure it has the latest firmware.

3. What can I do if I forget my password?

If you forget your password, you must reset the camera. Unfortunately, this process will change your settings back to factory default. To reset the camera, locate the reset button on the back of the camera. With the camera powered on, use an unfolded paper clip to hold the button down for 10 seconds. Run the setup procedure located on page 4 once the camera restarts.

4. Why is there a white haze when viewing in night vision mode?

When viewing in night vision mode, the IR lights on the camera may be reflecting off a nearby surface. Try repositioning the camera in order to avoid glare from IR LEDs.

Notes

Technical Support

This guide is only for initial configuration. Please refer to the user manual to learn more or visit <http://www.mydlink.com> for more information. Also feel free to contact us. U.S. and Canadian customers can contact D-Link Technical Support through our website.
