

1

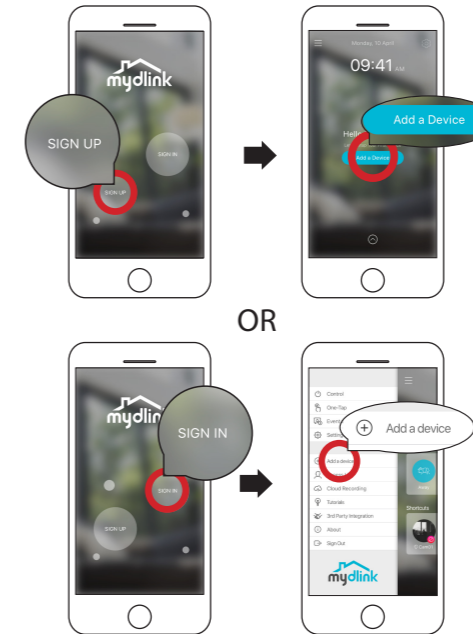

Plug the included USB Power Adapter into the back of the camera. Wait until the LED at the front changes from red to blinking orange.

2

To download and install the **mydlink** app on your mobile device, scan the QR code above for your Android or iOS device.

3

New users: Tap **Sign Up** to register for a mydlink account, then tap Add a Device to install your camera.
Existing users: Sign In using your mydlink account and tap the icon at the top left, then tap **Add a Device** to start the setup wizard.

4

When asked to scan the QR code, use the code found on the bottom of the camera. Repeat steps 1 through 4 to set up additional cameras.

Note: The QR and pin code on the bottom of the device is unique to the camera itself. Please be sure to scan each camera individually during set up.

Minimum Requirements

To install this product, you will need:

- 802.11n/g wireless router
- Internet connection
- A mobile device with Bluetooth 4.0 is required for setup.
- The latest version of the mydlink app from your operating system's application store.
- The mydlink app is available for iPhone, iPad and Android™ devices. Please refer to the mobile app's store page to check whether your device is compatible.
- An e-mail account (required to register for mydlink service)

Frequently Asked Questions

1. What is a mydlink account?

To use your mydlink device, you will need to register and sign in to a mydlink account. Once logged in, you can access your mydlink devices from anywhere via the Internet and enable features such as cloud recording for cameras.

2. What can I do if my camera is not working properly?

First, reset the camera and try setting the camera up again.

To make sure your hardware is installed correctly, make sure that:

- the power LED is green
 - your Internet connection is working
 - your router's wireless is turned on
 - your router supports UPnP*
 - both your mobile device and camera have a working Internet connection
- If your camera is still not working, check your router and make sure it has the latest firmware.

3. What can I do if I forget my camera password?

If you forget your password, you will need to reset your camera. This process will change all your settings back to the factory defaults.

To reset your camera, please use an unfolded paperclip to press and hold the Reset button for at least 10 seconds while your camera is plugged in. Repeat the setup procedure through the app after the camera reboots and the front LED is blinking orange.

4. Why is there a white haze when viewing in night vision mode?

When viewing in night vision mode, the IR lights on your camera may be reflecting off a nearby surface. Try repositioning your camera to avoid glare from IR LEDs.
