

Contents of Package:

DFE-530TX+ Fast Ethernet Adapter

Quick Install Guide

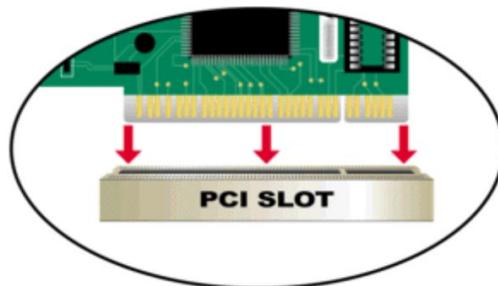

CD-ROM, which includes driver software

If any of the above items are missing, please contact your reseller.

**TURN OFF the computer and
unplug the power cord.**

1

Installing the DFE-530TX+ into the computer's PCI slot

Note: To avoid static electric charges, please touch an unpainted screw on the outside of the power supply before installing or working with the DFE-530TX+.

- **Turn off** your computer and **unplug** the power cord.
- **Remove** the back cover of your computer. (Refer to your computer's manual if needed.)
- **Locate** an available PCI slot. PCI slots are usually white or cream colored.
- **Remove** the backplate (the small piece of metal that covers the opening for the PCI card on the back cover that you just removed.)
- **Insert** the DFE-530TX+ carefully and firmly into the PCI slot.
- **Secure** the DFE-530TX+ with the screw from the backplate.
- **Replace** your computer's cover.

2

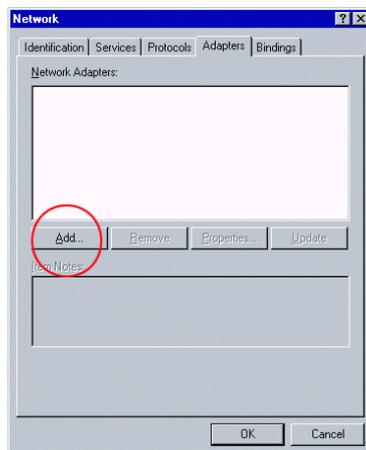

Installing the Drivers

- **TURN ON** the computer.
- **Go to Settings>Control Panel>Network**

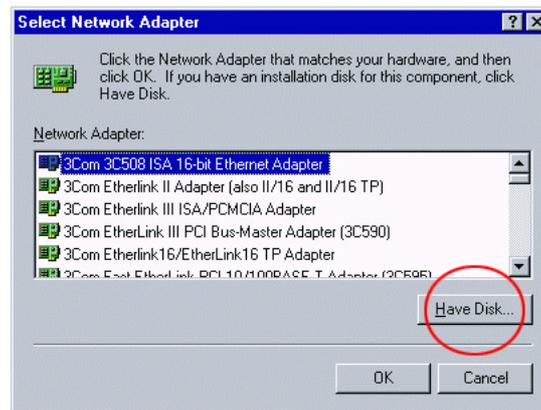

Double-click on the **Network** icon.

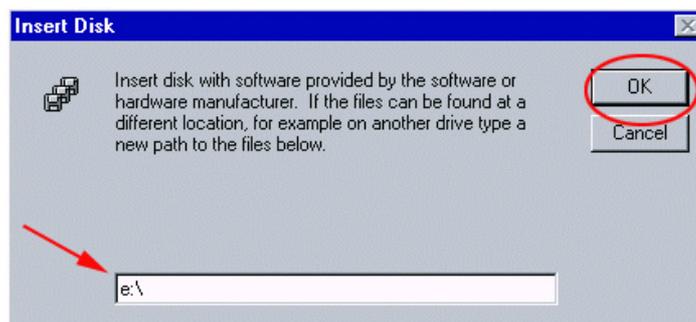

At the “**Network**” window, **click** on the “**Adapters**” tab.

Click “Add”

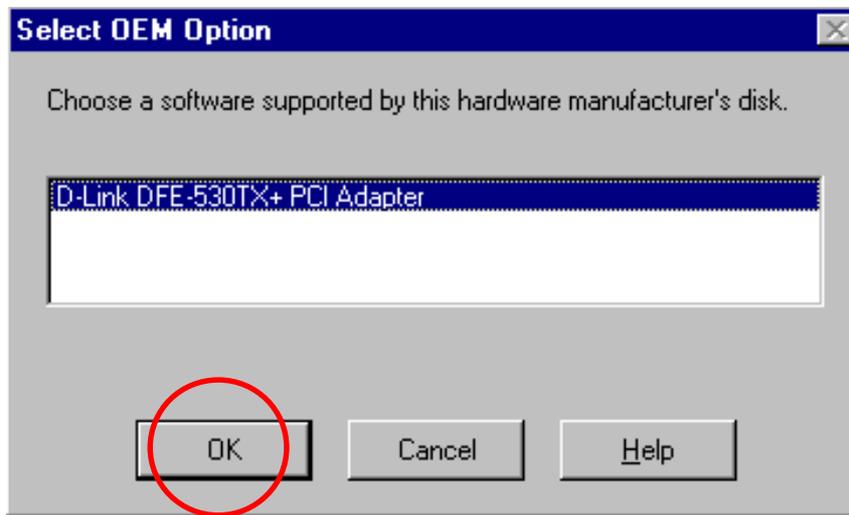

Click on “Have Disk”

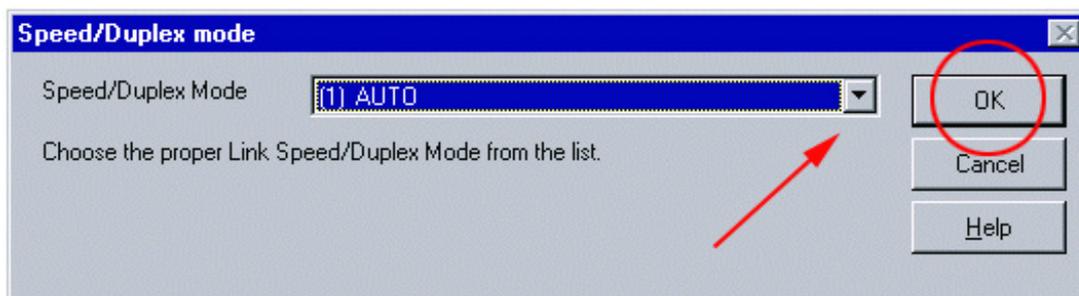

Type in the **CD-ROM** drive letter.

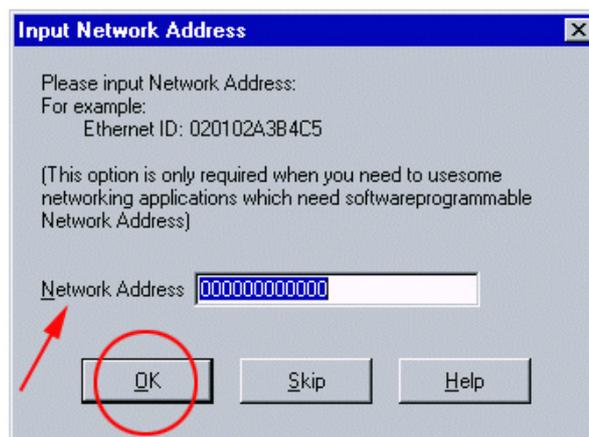

Click OK

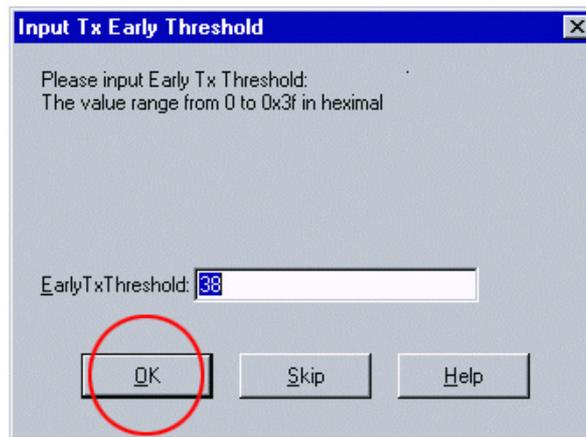

Click OK

Click “OK” to accept the “Auto” speed mode. To choose a fixed speed mode, make a selection from the “Speed/Duplex Mode” pull-down menu.

Click “OK” if you are not using IPX networking.
(Type the IPX network number into the “Network Address” field, if you are using IPX networking.)

Click “OK” to accept default setting.
