

DGS-1100-08PD Firmware Ver. : 1.00.006
DGS-1100-08PD Boot Code Ver. : 1.00.002
Published : March 27, 2017

The release notes include important information about D-Link switch firmware revisions. Please follow below steps to find version information:

- If you are installing a new switch, please check the hardware version on the device label. Make sure that your switch meets the system requirement of this firmware version. Please Refer to [Revision History and System Requirement](#) for firmware and hardware matrix.
- If the switch is powered on, you can check the hardware version by checking the device information page on the web graphic user interface.

If you plan to upgrade firmware, please refer to the [Upgrade Instructions](#) for the correct firmware upgrade procedure.

For detailed product information, please refer to [Related Documentation](#).

You can also download the switch firmware and technical documentation from <http://tsd.dlink.com.tw>.

Revision History and System Requirement:

Firmware Version	Date	Model	Hardware Version
Runtime: v1.00.006 Boot: v1.00.002	2017/3/27	DGS-1100-08P	B1

Upgrade Instructions:

You can download the firmware from D-Link web site <http://tsd.dlink.com.tw>, and upgrade through Web UI or D-Link Network Assistant Utility.

Upgrade using Web-UI

1. Connect a workstation installed with java SE runtime environment to any switch port of the device.
2. Open the web browser from the workstation and enter the IP address of the switch. The switch's default IP address is 10.90.90.90.
3. Enter administrator's password when prompted. The password is **admin** by default.
4. To update switch's firmware or configuration file, select **Tools > Firmware Upgrade & Backup** from the banner.

5. Click **Browse** to browse your inventories for a saved firmware file, and then click **Upgrade** after selecting the firmware file you want to restore

6. Login this switch when rebooting finish.

Upgrade using D-Link Network Assistant Chrome Edition

1. Connect a workstation installed with java SE runtime environment to any switch port of the device
2. Execute D-Link Network Assistant Chrome Edition

3. Click Refresh button to search target switch

4. Single click the icon of the column to choose the target switch

5. Click Firmware Upgrade button

6. Click Browse button and select the firmware file on your local hard drive.

7. Click “Upgrade now” button to start firmware upgrade.

8. Once the message changed to success, the firmware upgrade is complete

New Features:

DGS-1100-08PD:

Firmware Version	New Features
V1.00.006	First Release

Changes:

DGS-1100-08PD:

Firmware Version	MIB File	New Features
V1.00.006	First Release	

Problem Fixed:

DGS-1100-08PD:

Firmware Version	Problems Fixed
V1.00.006	First Release

* D-Link tracking number is enclosed in ()

Known Issues:

DGS-1100-08PD:

Firmware Version	Issues	Workaround
V1.00.006	None
