Quick Install Guide

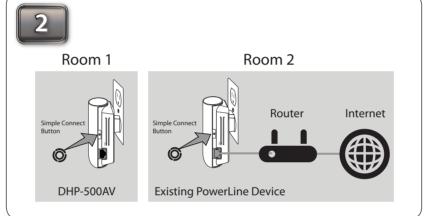

Installation

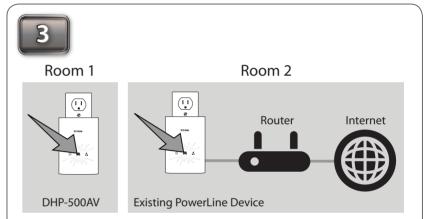

You must have at least two PowerLine devices (including your DHP-500AV) for your PowerLine network to function.

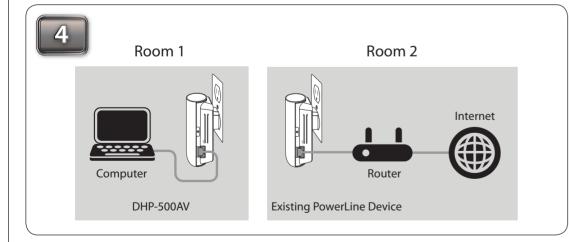

Plug the DHP-500AV into an AC wall outlet. Verify that the Power LED is lit. If not, insert into another outlet.

To secure your network, press the Simple Connect button for 2 seconds on one of your existing PowerLine devices. The Power LED will start to blink. Then, within 2 minutes, press the Simple Connect button on the DHP-500AV for 2 seconds.

Once the Power LEDs stop blinking, verify that the PowerLine LED is lit on both adapters. This indicates that your adapters are properly connected to each other. If the LED is not lit, insert one or both adapters into different outlets and repeat step 2.

You may now attach Ethernet devices such as a computer, game console, or media player via an Ethernet cable. With the Ethernet device powered on, verify that the Ethernet LED is lit on the adapters to indicate a good connection. Setup is complete.

Installation Tips

- 1. For best results, use in a standard wall outlet without any other products plugged into the same outlet. Connecting this product to a power strip or a surge protector may adversely affect the performance of this product.
- 2. Avoid using the PowerLine adapters in an electrical outlet that is located near an appliance that uses a lot of power such as a washer, dryer, refrigerator, microwave, hair dryer, or air conditioning system.
- 3. Plug the PowerLine adapters in the same room in order to verify whether your home's electrical wiring is suitable. Once configured you may place the PowerLine adapters to the location of your choice.
- 4. The D-Link PowerLine AV Utility (located on the included CD) is optional but is required for firmware upgrades; and is used to manually configure your security/encryption settings, reset your PowerLine adapters to the default settings, and display information such as firmware version, security settings, and connection quality/speed. Please refer to the User Manual also on the included CD.

Technical Support

Having trouble installing your new product? D-Link's website contains the latest user documentation and software updates for D-Link products.

U.S. and Canadian customers can contact D-Link Technical Support through our website or by phone.

United States Telephone: (877) 453-5465 Internet: http://support.dlink.com

Canada Telephone: (800) 361-5265 Internet: http://support.dlink.ca ©2011 D-Link Corporation/D-Link Systems, Inc. All rights reserved.
