

Quick Install Guide

PowerLine AV2 1000 Gigabit Starter Kit

Thank you for purchasing the PowerLine AV2 1000 Gigabit Starter Kit. Follow the easy steps in this guide to properly set up your PowerLine adapters. Please verify that all of the package contents listed below are available.

Package Contents

Two PowerLine AV2 1000 Gigabit Adapters (DHP-600AV)

Two Ethernet Cables

Quick Install Guide

If any of the above items are missing, please contact your reseller.

DHP-601AV

Hardware Overview

1	Power LED	<ul style="list-style-type: none"> • Solid: The device is receiving electrical power. • Blinking: The device is powering up or in power saving mode. • Off: The device is not receiving electrical power.
2	PowerLine LED	<ul style="list-style-type: none"> • Solid: The device is connected to a Powerline network. • Off: The device has not found any other compatible Powerline devices using the same encryption key. <p>The color indicates the Powerline link rate:</p> <ul style="list-style-type: none"> • Green: The Powerline link rate is best. • Amber: The Powerline link rate is better. • Red: The Powerline link rate is good.
3	Ethernet LED	<ul style="list-style-type: none"> • Solid: The Ethernet port is linked. • Off: There is no Ethernet connection.
4	Simple Connect Button/Reset Button	Press and hold the button for two seconds to secure your network or hold the button for 10 seconds to reset to the factory default settings.
5	Gigabit Ethernet Port	Connect to a 10/100/1000 Ethernet device such as a router, computer, gaming console, network storage unit, or a media player.

Recommendations

- For best results, use in a regular wall outlet without any other devices plugged in. Plugging into a power strip or a surge protector may adversely affect the performance of this product.
- Avoid using the PowerLine adapters in an electrical outlet that is located near an appliance that uses a lot of power, such as a washer or dryer, refrigerator, microwave, hair dryer, or air conditioning unit.
- To verify connectivity or if you are having connection problems, plug the adapters in the same room to verify whether your home's electrical wiring is contributing to the issue. The adapters' PowerLine LED indicators will illuminate if the connection is established. Once configured you may place the adapter in the location of your choice.

Installation

- 1 Plug in one of the DHP-600AV adapters and connect to your router with an Ethernet cable. The Power and Ethernet LEDs should both light up.

- 2 Plug in the other DHP-600AV adapter in the room that you want to extend your network. The Power LED will turn on.

- 3 Verify that the PowerLine LEDs on both adapters are lit. If they are, the adapters are connected. If not, try another outlet.

- 4 (Optional) To secure your network, press the Simple Connect button (on the bottom) for two seconds on one of the adapters. The Power LED will start to blink. Then, within two minutes, press the Simple Connect button on the other adapter for two seconds. Once the Power LEDs stop blinking, verify that the PowerLine LED is lit on both adapters (as in Step 3). This indicates that your adapters are properly connected to each other.

- 5 You can now connect another device using an Ethernet cable to the DHP-600AV adapter. Verify that the Ethernet LED is lit. Your installation is completed.
