

QUICK INSTALL GUIDE

DIR-451

VERSION 1.2

D-Link®

MOBILE

Package Contents

- D-Link DIR-451 Mobile Router
- Power Adapter
- Ethernet Cable
- Manual and Warranty on CD

Note: Using a power supply with a different voltage rating than the one included with the DIR-451 will cause damage and void the warranty for this product.

If any of the above items are missing, please contact your reseller.

System Requirements

- A compatible 32-bit PCMCIA (UMTS or HSDPA) card with service*
- Computers with Windows®, Macintosh®, or Linux-based operating systems with an installed Ethernet adapter
- Internet Explorer Version 6.0 or Netscape Navigator™ Version 6.0 and above (for configuration)

** Subject to services and service terms available from you carrier.*

Note: Please make sure your UMTS/HSDPA card has the latest firmware/driver. Firmware upgrades are not supported when inserted into D-Link routers, please perform the firmware upgrade as per card Manufacturer or Carrier instructions.

Connect to your network

Note: Ensure that power to your DIR-451 Mobile Router is not connected before performing the installation steps below.

32-bit PCMCIA (UMTS or HSDPA) Card Connection

1. Attach the antenna.
 - a. Remove the antenna from its plastic wrapper.
 - b. Screw the antenna in a clockwise direction to the back panel of the unit.
 - c. Once secured, position the antenna upward at its connecting joint. This will ensure optimal reception.
2. Insert your wireless 32-bit PCMCIA (UMTS or HSDPA) Card into the Internet Card Slot on the back of the router.
3. Insert the Ethernet cable into LAN Port 1 on the back panel of the DIR-451 Mobile Router, and an available Ethernet port on the network adapter in the computer you will use to configure this unit.

Note: The DIR-451 Mobile Router LAN Ports are “Auto-MDI/MDIX.” This provides either patch or crossover Ethernet cable LAN Port access.

4. Connect the power adapter to the receptor on the back panel of your DIR-451 Mobile Router. Then plug the other end of the power adapter into a wall outlet or power strip.
 - a. The Power LED will turn ON to indicate power has been applied.
 - b. Other LEDs will flash ON and OFF as the DIR-451 Mobile Router performs initialization and Internet connection processes. This will take a few minutes.
 - c. When complete, the following LEDs will illuminate blue: Power, Status, Internet, WLAN, and LAN Port 1 (or your specific LAN Port connection).

Note: Please make sure your UMTS/HSDPA card has the latest firmware/driver. Firmware upgrades are not supported when inserted into D-Link routers, please perform the firmware upgrade as per card Manufacturer or Carrier instructions.

Using the Setup Wizard

Open your web browser and type `http://192.168.0.1` into the URL address box. Press **Enter**.

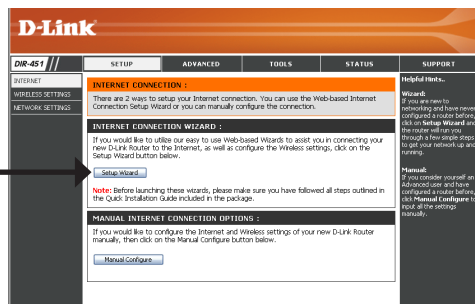

The logon pop-up screen will appear:

Type **admin** for the username and leave the password blank. Click **Log In** to continue.

Once you have logged in, the Setup screen will appear:

Click **Setup Wizard**

Click **Launch Internet Connection Setup Wizard** to begin.

Click **Launch Internet Connection Setup Wizard** to begin.

Click **Next** to continue.

Click **Next**

Create a new password and then click **Next** to continue.

Click **Next**

Select your time zone from the drop-down menu and then click **Next** to continue.

Click **Next**

Select the Country, ISP and Card from the drop-down list and then click **Username / Password Connection (WWAN)**. Click **Next** to continue.

STEP 3: CONFIGURE YOUR INTERNET CONNECTION

Your Internet Connection could not be detected, please select your Internet Service Provider (ISP) from the list below.

Country - ISP - Card List

Indonesia -- Select your ISP -- Select your card --

If your Internet Service Provider was not listed or you don't know who it is, please select the Internet connection type below:

☒ **Username / Password Connection (WWAN)**

Choose this option if your Internet connection requires a username and password to get online. Most DSL modems use this connection type of connection.

Prev Next Cancel

Click **Next**

Enter your WWAN user name, password, and server information. If you do not have this information, please contact your ISP. For other information, you can look at the *UMTS/HSDPA Setup* section in the manual.

SET USERNAME AND PASSWORD CONNECTION (WWAN)

To set up this connection you will need to have a Username and Password from your Internet Service Provider. You also need WWAN Server Name and Dial Number. If you do not have this information, please contact your ISP.

WWAN User Name : ISPOA@CINGULARGPRS.COM (optional)

WWAN Password : (optional)

WWAN Verify Password : (optional)

WWAN Server Name : (optional)

WWAN Dial Number : *99***1#

WWAN APN : isp.cingular

Auto-Reconnect : ☒ Enabled ☐ Disabled

Keep-alive Interval : 60 (seconds)

Keep-alive Server 1 : (optional)

Keep-alive Server 2 : (optional)

Prev Next Cancel

Click **Next**

Click **Connect** to save your settings. Once the router is finished rebooting, click **Continue**. Please allow 1-2 minutes to connect.

SETUP COMPLETE!

The Setup Wizard has completed. Click the Connect button to save your settings and reboot the router.

Prev Connect Cancel

Click **Connect**
