

DNS-1550-04, DNS-1250-04, DNS-1250-06 Firmware Release Notes

 Firmware Version:
 V03.01.4800.05

 Published Date:
 2014/7/18

Content:

Upgrading Instructions:	. 2
New Features:	2
Problems Fixed:	
Known Issues:	6
Related Documentation:	6

Revision History and System Requirement:

Firmware Version	Date	Model	Hardware Version
V03.00.4800.28	2011/9/22	DNS-1550-04	A1
V03.00.4800.33 &		DNS-1550-04	DNS-1550-04 rev. A1 and A2
Sharecenter NAVI 1.9.4800.5 (for	2012/4/17	DNS-1250-04	DNS-1250-04 A1
windows) and 1.9.4800.3(for MAC)		DNS-1250-06	DNS-1250-06 A1
		DNS-1550-04	DNS-1550-04 rev. A1 and A2
V03.01.4800.01	2012/7/11	DNS-1250-04	DNS-1250-04 A1
		DNS-1250-06	DNS-1250-06 A1
V03.01.4800.05	2014/7/18	DNS-1550-04	DNS-1550-04 rev. A1

Upgrading Instructions:

Please follow the steps as below when doing firmware upgrade.

- Step 1: upgrade 03.01.4800.05_pef.upg (in order to upgrade the upgrading tool)
- Step 2: upgrade 03.01.4800.05.upg

New Features:

dlink green

Fireware Version	New Features
V03.00.4800.28	Initial Release for DNS-1550-04
V03.00.4800.28	Initial Release for DNS-1250-04/ DNS-1250-06.
	[New Features]
	1. Add Dropbox backup
	2. Batch user creation
	3. User import/export
	4. Add Microsoft DFS
	5. Add Apple Time machine backup
V03.00.4800.01	6. Add NAS replication to iSCSI (restore from iSCSI)
	7. Add iSCSI boot
	8. Add Automatic Acoustic Management in physical drive
	9. Add DMC in DLNA package
	10. Add SMS support
	[Enhancement]
	1. AD domain permission save/restore

2. Open Amazon S3 and Dropbox to user mode.
3. Support SFTP (SSH)
4. Support multiple printers
5. Add backup policy in remote backup (add/sync/copy)
6. Support VessRAID remote backup (VessRAID auto-list)
7. Dashboard enhancement
- Firmware download directly in dashboard
- Add backup status dashboard
- Add file system status
- Add CPU/memory usage
8. Event log
- Add event filter
- Send alert mail by level settings.
9. Add user monitor
10. Support remote OPAS
11. Add soft-quota control
12. Add operating log system
13. Add self-diagnostic
14. Support upgrade FW without drives

Problems Fixed:

Firmware Version	Problems Fixed
V03.00.4800.28	N/A
	1. RB-200325: FW_SFTP can login DNS-1250/ 1550 and see all data in NAS.
	2. RB-200765: MacOS 10.7 can't access DNS-1250/ 1550 AFP function.
	3. RB-200907: "successful"wording issue on iSCSI PING
	4. RB-200908: "Alias must contain only alphanumeric characters, blan
	spaces and underscores." Issue
V03.00.4800.29 (Non-release version)	 RB-200911: "Enable Power Management" in disk array settings could not checked
	6. RB-200913: "disconnect" wording issue while setting up the
	message alert
	7. RB-200914: .adlocks folder and .backupcfg file need to be hidden
	from FileZilla
	8. RB-200915: AD group could change AD members in wizards but
	could not be saved

		9. RB-200916: User name could not be more than 16 characters
		10. RB-200917: While NAS unit joined AD, can't create any local account
		11. RB-200925: Test E-mail alert shows no messages for the user if it is successful or not
		12. RB-200970: EVT:LUM Mapping can not be setting , when just one initiator
		13. RB-200971: EVT: The firmware upgrade page will hyperplasia, when
		click this page during deleting filesystem
		14. RB-200973: EVT: The typesetting of LD should be more smoothly
		15. RB-200975: EVT: The typesetting of FW upgrade should be more smoothly
		16. RB-200982: FTP setting fails
		17. RB-200990: E-mail alert with SMTP Authentication function does not work with Gmail
		18. RB-201008: [FW] Can't support Windows 2008 R2 AD server when
		setup server base on Windows 2008R2.
		19. RB-201205: NAS DNS-1250-04 and DNS-1550-04 remote
		replication failure
		20. RB-201224: iSCSI session is created between two NAS units,
		promise node name will appear
	V03.00.4800.30 (Non-release version)	Remove all "Vendor's name and logo" on firmware and software
		1. RB-200925: Test E-mail alert shows no messages for the user if it is
		successful or not 2. RB-201439: iSCSI connection between two NASes, ign name is
	V03.00.4800.31	missing
	(Non-release version)	3. RB-201536: Dashboard shows the wrong icon highlighted4. RB-201524: Click on GUI, it sends the user back to login page.
	version)	4. RB-201524: Click on GUI, it sends the user back to login page.5. RB-201561: No need for firmware update reminder on GUI
		6. RB-201548: SNMP settings not saving after reboot.
		1. RB-200911: [PTT/Dlink] "Enable Power Management" in disk array
		settings could not checked 2. RB-201523: [PTT/Dlink][Suggestion] Poor grammar – "is fails" It
		should be "This operation has failed"
	V02 00 4000 22	3. RB-201528: [PTT/Dlink][suggestion] Poor grammar – "Move
	V03.00.4800.32 (Non-release	Successfull" when moving files on Web file manager 4. RB-201939: [PTT/D-LINK] Smart log can not be enabled
	version)	5. RB-201941: [PTT/Dlink] Email alert can't work on Hinet SMTP:
		msa.hinet.net 6. RB-201938: [PTT/Dlink] Remote backup can only "SYNC"
		7. RB-202066: [PTT/Dlink] Firmware can't be updated when the unit is
		on safe mode 8. RB-202059: [PTT/Dlink] When the GUI stays in "device", press F5
dlink	000	To: RE 202033. [FIT/Billik] When the Got stays in device, pless 13]
dlinktgr	een	

dlinkigreen

1. RB-200911: "Enable Power Management" in disk array settings could not checked 2. RB-202059: When GUI stays in "device", press F5 might go somewhere else 3. RB-202450: the size for the file system is "-1" 4. RB-202327: Enabling iscsi lun masking cause boot sequence error 5. RB-202218: User "administrator" is unable to shutdown the device 6. RB-202189: Specific Delete DA steps will Crash 7. RB-202186: WPPe_Physical Drive setting should be synchronized in front view 9. RB-202185: WPPe_Offline function should remove in front view. 1. RB-203323: there is no event for local backup 2. RB-203320: manually run local backup will cancel the schedule 3. RB-203317: migration had done, but ,file system extention doesn't really work. 4. RB-202580: when iSCSI connection got disconnect, it actually got deleted 7. RB-203246: When the user is added to the second group, the user in the original group will disappear 8. RB-203248: iSCSI backup status shift a row 9. RB-202211: Target enable uni-direction CHAP authentication, then the other NAS car't connect by iscsi initiator 13. RB-203049: file is not found after factory default restore for DSN1550 12. RB-20211: Target enable uni-direction CHAP authentication, then the other NAS car't connect by iscsi initiator 13. RB-203049: file is not found after factory default restore for DSN1550 12. RB-2020321: Target enable uni-direction CHAP authentication,		might go somewhere else
 V03.01.4800.01 NB-20323: there is no event for local backup RB-203320: manually run local backup will cancel the schedule RB-203317: migration had done, but ,file system extention doesn't really work. RB-202932: No information for device/iscsi/port about iscsi connection information RB-203048: iTune server 10 doesn't seem to work with NAS RB-202580: when iSCSI connection got disconnect, it actually got deleted RB-203246: When the user is added to the second group, the user in the original group will disappear RB-203428: iSCSI backup status shift a row RB-20374: "Create ISO folder" can't browse through image file and it can not work properly RB-203049: file is not found after factory default restore for DSN1550 RB-203028: EVT:Fans and LED settings cause Malfunction RB-203004: EVT:Fans and LED settings cause Malfunction RB-203004: EVT:Fans and LED settings cause Malfunction RB-206179: Remote backup doesn't work indeed RB-206204: After join AD domain, the group of domain, in NAS doesn't show the members SRB-204730: Port speed is not updated when the speed of the switch is changed RB-20473: NAS backup to USB device can not work normally 		not checked 2. RB-202059: When GUI stays in "device", press F5 might go somewhere else 3. RB-202450: the size for the file system is "-1" 4. RB-202327: Enabling iscsi lun masking cause boot sequence error 5. RB-202223: User "administrator" is unable to shutdown the device 6. RB-202189: Specific Delete DA steps will Crash 7. RB-202188: Enable Smart of Function description error 8. RB-202186: WPPe_Physical Drive setting should be synchronized in front view
 2. RB-203320: manually run local backup will cancel the schedule 3. RB-203317: migration had done, but ,file system extention doesn't really work. 4. RB-202932: No information for device/iscsi/port about iscsi connection information 5. RB-203048: iTune server 10 doesn't seem to work with NAS 6. RB-202580: when iSCSI connection got disconnect, it actually got deleted 7. RB-203246: When the user is added to the second group, the user in the original group will disappear 8. RB-203428: iSCSI backup status shift a row 9. RB-202914: default folder permission after letting NAS unit join AD 10. RB-203074: "Create ISO folder" can't browse through image file and it can not work properly 11. RB-203049: file is not found after factory default restore for DSN1550 12.RB-202211: Target enable uni-direction CHAP authentication, then the other NAS can't connect by iscsi initiator 13. RB-203028: EVT:Fans and LED settings cause Malfunction 14. RB-206179: Remote backup doesn't work indeed 2. RB-206204: After join AD domain, the group of domain, in NAS doesn't show the members 3. RB-204730: Port speed is not updated when the speed of the switch is changed 4. RB-204738: OPAS file doesn't seem to be working 5. RB-204733: NAS backup to USB device can not work normally 		
3. RB-203317: migration had done, but ,file system extention doesn't really work. 4. RB-202932: No information for device/iscsi/port about iscsi connection information 5. RB-203048: iTune server 10 doesn't seem to work with NAS 6. RB-202580: when iSCSI connection got disconnect, it actually got deletedV03.01.4800.017. RB-203246: When the user is added to the second group, the user in the original group will disappear 8. RB-203074: "Create ISO folder" can't browse through image file and it can not work properly 11. RB-203074: "Create ISO folder" can't browse through image file and it can not work properly 11. RB-203049: file is not found after factory default restore for DSN1550 12.RB-202211: Target enable uni-direction CHAP authentication, then the other NAS can't connect by iscsi initiator 13. RB-203004: EVT:Fans and LED settings cause Malfunction 14. RB-203004: EVT:Fans and LED settings cause Malfunction 14. RB-203004: EVT:Fans and LED settings cause Malfunction 15. RB-203021: After join AD domain, the group of domain, in NAS doesn't show the membersV03.01.4800.053. RB-204730: Port speed is not updated when the speed of the switch is changed 4. RB-204738: OPAS file doesn't seem to be working 5. RB-204733: NAS backup to USB device can not work normally		
V03.01.4800.01really work.4. RB-202932: No information for device/iscsi/port about iscsi connection information 5. RB-203048: iTune server 10 doesn't seem to work with NAS 6. RB-202580: when iSCSI connection got disconnect, it actually got deleted 7. RB-203246: When the user is added to the second group, the user in the original group will disappear 8. RB-2030428: iSCSI backup status shift a row 9. RB-202914: default folder permission after letting NAS unit join AD 10.
