

CONFIGURATION:

The following screen images represent a recommended configuration of the D-Link DPH-540/ 541 Version 1 phone for use with the Teltel VoIP service. These parameters need to be manually entered using the device's web server GUI.

Please setup the wireless connection from your phone to the access point per the Quick Install Guide, Setting Up Your Phone .

Obtain the IP address of the phone by selecting Status from the initial display.

In a web browser enter the IP address of the phone

If you have not changed the default Username and Password enter admin for the username and admin for the password. If the default username and password has been modified enter the modified values into the username and password fields

Select SIP Settings on the left hand side of the menu.

| SIP Account List | | | |
|------------------|--|--------|--|
| 1: | <input type="text" value="Teltel"/> | Active | <input type="button" value="Configure"/> <input type="button" value="Remove"/> |
| 2: | <input type="text" value="< SIP Account >"/> | | <input type="button" value="Configure"/> <input type="button" value="Remove"/> |
| 3: | <input type="text" value="< SIP Account >"/> | | <input type="button" value="Configure"/> <input type="button" value="Remove"/> |
| 4: | <input type="text" value="< SIP Account >"/> | | <input type="button" value="Configure"/> <input type="button" value="Remove"/> |
| 5: | <input type="text" value="< SIP Account >"/> | | <input type="button" value="Configure"/> <input type="button" value="Remove"/> |
| 6: | <input type="text" value="< SIP Account >"/> | | <input type="button" value="Configure"/> <input type="button" value="Remove"/> |

Select Configure to the right of the desired SIP Access List choice.
