

DSP-W320

Outdoor Wi-Fi Smart Plug

D-Link[®]

Product Highlights

IP54 Weather Resistant

Protection from rain, perfect for outdoor installation

Independent Outlet Control

Manage each outlet separately – like having two smart plugs

Automatic Scheduling

Turn on/off your home appliance based on time/date schedules

Smart Home Brilliance, Made for the Outdoors.

The DSP-W320 Outdoor Wi-Fi Smart Plug is a versatile and easy-to-use device that allows you to monitor and control outdoor electrical appliances from wherever you are. It has an IP54 rating, which means it can withstand outdoor weather environments such as rain, snow or dust storms. Its compact size lets you inconspicuously integrate outdoor areas into your connected home system and the legible LEDs let you know the status at a glance. Automatic scheduling provides a helpful way to save power while you're at work or asleep, and the mydlink™ app provides an easy way to set up alerts or manually power a device on or off, giving you peace of mind – anytime.

Weather-Resistant. Outdoor-Ready

The DSP-W320 Outdoor Wi-Fi Smart Plug is IP54 weather resistant and dust proof design keeps the Outdoor Wi-Fi Smart Plug protected in inclement weather and dusty environments. Got a sprinkler or garden hose near your power outlet? This outdoor smart plug stands up to wet encounters in your backyard, so you can be sure your connected appliances stay powered on all the time. And with weather-resistant seals, the outlets stay protected from weather penetration when not in use. Working in the garden? Well, don't worry about kicking up dust as the IP54 rating protects it from any dirt thrown at it.

Control With Your Voice

Got your hands full serving drinks or working the grill at your backyard barbecue party? The Outdoor Wi-Fi Smart Plug works with the Google Assistant and Amazon Alexa to let you turn on your fairy lights and holiday decorations instantly with voice commands. Keep your summer party guests cool with voice-activated fans, and make their jaws drop in amazement with a voice-controlled fog machine. Throwing an amazing backyard party has never been easier.

Two Independently-Controlled Outlets, No Hub Required.

Unlike other dual-outlet smart plugs that force you to turn on and off two appliances simultaneously, the Outdoor Wi-Fi Smart Plug gives you more flexibility with two independently-controlled outlets. Turn on your Christmas lights and leave the water sprinkler off. Or turn them both on if you want. It's your smart home – your choice. If you're sick and tired of connecting to and figuring out a new smart hub for every smart device in your home, you'll love the Outdoor Wi-Fi Smart Plug. It connects to your home Wi-Fi directly and easily so there's no hub required. And because it works with the intuitive mydlink app, your smart home will be set up for outdoor greatness in no time.

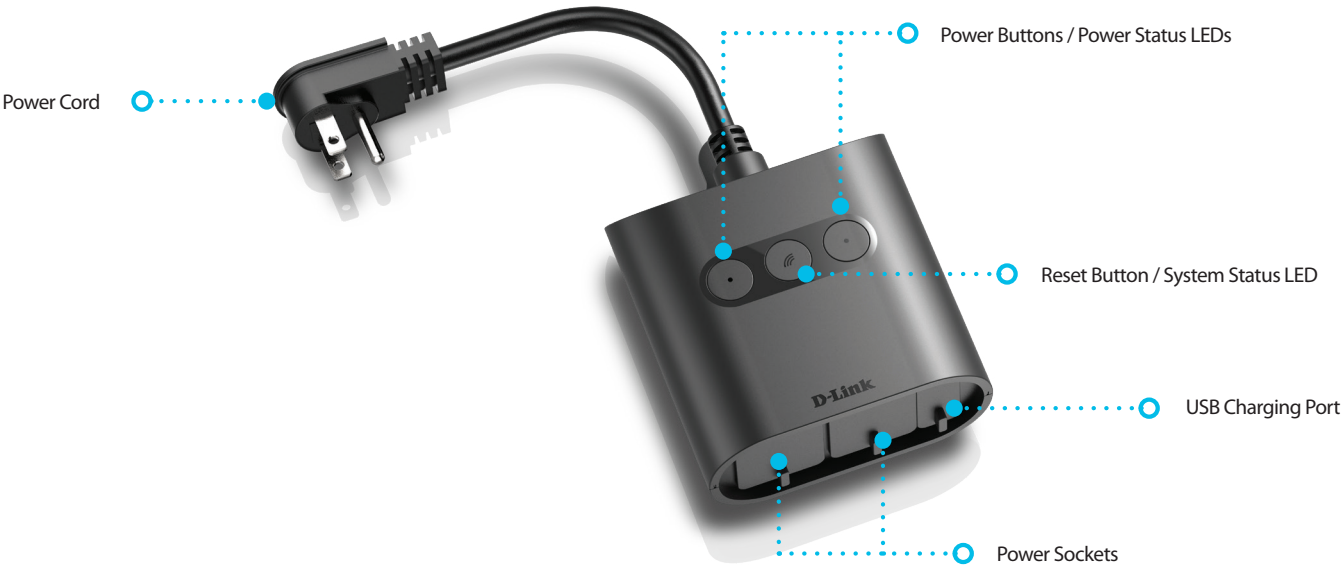

Features

- ◆ Weather-resistant (IP54) design for outdoor appliances
- ◆ 2 independent outlets for more flexible control over multiple devices
- ◆ Smart remote power control
- ◆ USB charging port
- ◆ Power scheduling
- ◆ Countdown timer
- ◆ Automation
- ◆ Wireless 802.11n - no hub required
- ◆ mydlink™ app support
- ◆ FOTA (firmware over-the-air upgrade)
- ◆ Google Assistant / Amazon Alexa / IFTTT support

Control Devices From Anywhere With The mydlink App

No more wondering if you left your pool filter or patio lights on while away on vacation. The mydlink app lets you see the power status of each socket, and turn them off with a touch on your smartphone. But that’s not all. With mydlink you can set automated schedules on your outdoor lights to make it look like you’re at home while away on vacation. Turn on your front door lights automatically when guests step onto your porch. Or turn off your holiday decorations every time you leave the house. Sounds like magic? Not so, when you combine the Outdoor Wi-Fi Smart Plug with other mydlink cameras and sensors to trigger amazing home automations around your home. Use motion-detection and contact-sensor functionality in mydlink Smart Home devices to create a smart home so responsive, it’s almost like magic!
