

Quick Install Guide

7-Port USB 2.0 Hub

Product Overview

Front Panel

Back Panel

Installation

1. Plug the power adapter into an AC power source and connect the other end to the power connector on the DUB-H7.

2. Plug the square end of the supplied USB 2.0 cable (Type B connector) into the upstream port on the DUB-H7.

3. Plug the flat end of the supplied USB 2.0 Cable (Type A connector) into your computer's USB 2.0 or USB 1.1 port.

4. Your computer will automatically detect the DUB-H7 and install the necessary drivers. Once installed, you may plug in your USB devices.

USB fast charging ports provide high power under Fast-Charge Mode (Green LED), allowing you to charge your iPad®, iPhone®, tablets, and other mobile devices.

Note: Plug in each USB device one at a time.

Fast-Charge Mode

1. In Standard Mode (Blue LED), all seven USB ports deliver maximum 0.5A of current.
2. In Fast-Charge Mode (Green LED), all seven USB fast charging ports deliver a total maximum of 3A of current.
3. Enter the Fast-Charge Mode by disconnecting the DUB-H7 from your computer, or by powering off your computer, or putting the computer in sleep/hybernate mode.
4. You may now connect your iPad®, iPhone®, tablets, or other mobile devices to the fast charging ports to charge the battery.

Note: Please refer to the iPad® charging section for more details about charging your iPad® with the DUB-H7. The total combined power draw of 7 ports will not exceed 12W or 2.4A. The actual charge capacity provided is dependent on attached device needs.

iPad® Charging

When the DUB-H7 is connected to a computer that is powered on, a connected iPad® may display the “Not Charging” status, but will be charging very slowly. You can quickly charge your iPad with the USB fast charging port on the DUB-H7 when:

- Computer is off
- Computer is in standby/sleep mode
- DUB-H7 is disconnected from your computer

Charging and Syncing Your iPad® At The Same Time (Windows® Only)

- If you want to charge and sync your iPad® simultaneously when it is connected via the DUB-H7 to a Windows computer, go to the Product Support page for the DUB-H7 (<http://support.dlink.com/DUB-H7>) to download and install the “iPad Charge” utility onto your computer.
- After successfully installed, a charger icon will appear in the taskbar.
- Now you'll be able to sync and charge your iPad® at the same time with the fast charging ports on the DUB-H7.

Note: After the utility is installed, fast charging ports will deliver maximum 2.4A current to an iPad® when you connect the DUB-H7 to the computer. If two iPads are connected, each will receive maximum 1.5A (3A ADP / 2 =1.5A) current. The DUB-H7 must be connected to the power adapter to properly charge the iPad®.
