<sup>1</sup> Maximum wireless signal rate derived from IEEE Standard 802.11 specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range. Wireless range and speed rates are D-Link RELATIVE performance measurements based on the wireless range and speed rates of a standard Wireless G product from D-Link. Maximum throughput based on D-Link wireless devices.

<sup>2</sup> Using a USB 1.1 port will affect device performance. USB 2.0 port recommended.

<sup>3</sup> 1-Year Limited Warranty available only in the USA and Canada.
