# **Quick Install Guide**

Wireless N USB Adapter

Thank you for purchasing the Wireless N USB Adapter. Follow the easy steps in this guide to properly set up your adapter. Please verify that all the package contents listed below are available.

## **Package Contents**

DWA-135 Wireless N USB Adapter

CD with drivers

If any of the above items are missing, please contact your reseller.

#### **System Requirements**

- A desktop computer with an available USB 2.0 slot
- Windows® 7, Windows Vista® (32/64-bit), XP (32/64-bit with Service Pack 2 or higher)
- 300MHz processor and at least 64MB of RAM
- An 802.11g/n access point or wireless router

#### **What This Product Does**

The D-Link DWA-135 is an 802.11n wireless adapter that delivers unrivaled performance for your laptop or desktop computer. Once connected, access your network's high-speed Internet connection while sharing photos, files, music, video, printers, and storage.

#### **Before You Begin**

Before installing your new D-Link wireless adapter, please verify the following:

- · Remove any previous installations of wireless adapters.
- · Disable any built-in wireless adapters.
- Verify the settings such as the wireless network name (SSID) and security settings of the network(s) you want to connect to.

**Note:** If you've installed a different manufacturer's adapter or a different model D-Link adapter, make sure the software is uninstalled before installing the new software. Some utilities may cause a conflict with the new software. Windows 7, Windows Vista\* and XP users may use the built-in wireless utility.

#### Installation

Note: Do NOT plug the adapter into your computer before installing the drivers.

Insert the DWA-135 Driver CD into the CD-ROM drive. When the autorun screen appears, click **Install** and follow the on-screen instructions to install the wireless adapter drivers and software.

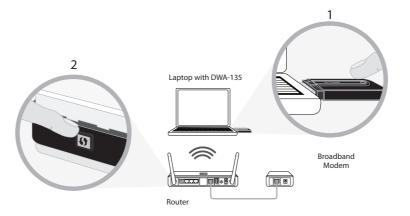

If the CD Autorun function does not automatically start on your computer, go to **Start** > **Run**. In the run box type "**D:\autorun.exe**" (where D: represents the drive letter of your CD-ROM drive) and click **OK**.

### Wi-Fi Protected Setup (WPS)

Wi-Fi Protected Setup (WPS) System is designed for easy setup of security enabled Wi-Fi networks. It is recommended to have the access point or wireless router nearby during setup.

### **Push Button Configuration**

- 1. To connect to your network, press the WPS button on the adapter and hold for three seconds until the wizard screen appears.
- 2. Press the WPS button located on your access point or router to continue. This screen will appear once you have successfully established connection with your network.

# Connect to a Wireless Network - Using Windows® 7

Windows 7 users may use the built-in wireless utility.

If you receive the **Wireless Networks Detected** bubble, click on the center of the bubble to access the utility.

or

Left-click the wireless icon in your system tray (lower-right corner next to the time).

The utility will display any available wireless networks in your area. Click on a network (displayed using the Network Name) and click the **Connect** button.
