

RANGEBOOSTER N® USB ADAPTER

Wirelessly connect to the Internet for work or play

Greater wireless reception around your home or office

Backward compatible with Wireless G networks

EXCEPTIONAL PERFORMANCE

The D-Link® RangeBooster N® USB Adapter (DWA-140) is a Wireless N compliant adapter for your desktop or notebook PC. It delivers up to 12x faster speeds¹ and 4x farther range¹ than an previous-generation network while staying backward compatible with Wireless G networks. Once connected, you can share a high-speed Internet connection, photos, files, music, printers, and more.

GET CONNECTED, STAY CONNECTED

The DWA-140 is powered by RangeBooster N technology to provide superb wireless performance in the home or office. Connect to a RangeBooster N Router (DIR-628) and experience smooth Internet phone calls (VoIP), responsive network gaming, secure Web surfing, faster file transfers, enhanced audio streaming, and greater wireless coverage in larger homes and offices¹. The DWA-140 supports WPA™ and WPA2™ encryption and includes a Wi-Fi Protected Setup™ (WPS) Push Button to easily connect to a wireless network.

EASY TO SETUP, EASY TO USE

The D-Link Quick Adapter Setup Wizard guides you step-by-step through the installation process. Configure this USB adapter without having to call a networking expert to help you. The D-Link Wireless Manager is also included with this product to keep track of your most frequently accessed networks so that you can join them quickly and easily.

With unmatched wireless performance, reception, and security protection, the D-Link RangeBooster N USB Adapter (DWA-140) is a great choice for easily adding or upgrading wireless connectivity to your desktop or notebook PC.

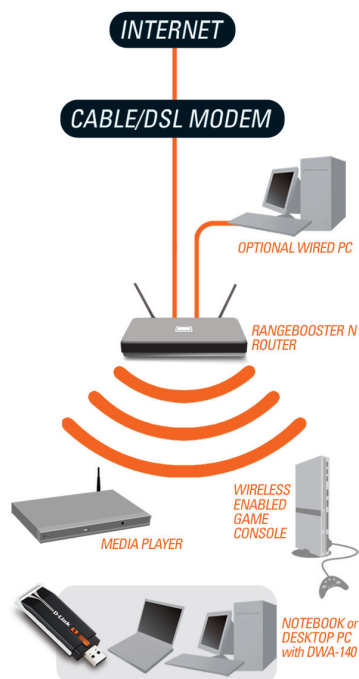

WHAT THIS PRODUCT DOES

Connect your desktop or notebook computer with an available USB port to a wireless network and access a high-speed Internet connection, transfer files, and stream media from greater distances around your home or office.

- ¹ Maximum wireless signal rate derived from IEEE Standard 802.11 specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range. Wireless range and speed rates are D-Link RELATIVE performance measurements based on the wireless range and speed rates of a standard Wireless G product from D-Link. Maximum throughput based on D-Link Wireless N devices.
- ² Using a USB 1.1 port will affect device performance. USB 2.0 port recommended.
- ³ 1-Year Limited Warranty available only in the USA and Canada.
- ⁴ Computer must adhere to Microsoft's recommended System Requirements.
