DWA-171 AC600 MU-MIMO Wi-Fi USB Adapter

Quick Install Guide

If any of the above items are missing, please contact your reseller.

## System Requirements

- An available USB slot
- Windows® 10, 8.1, 7
- An 802.11ac, 802.11n, or 802.11g wireless network
- 20MB of free hard drive space

## Before You Begin

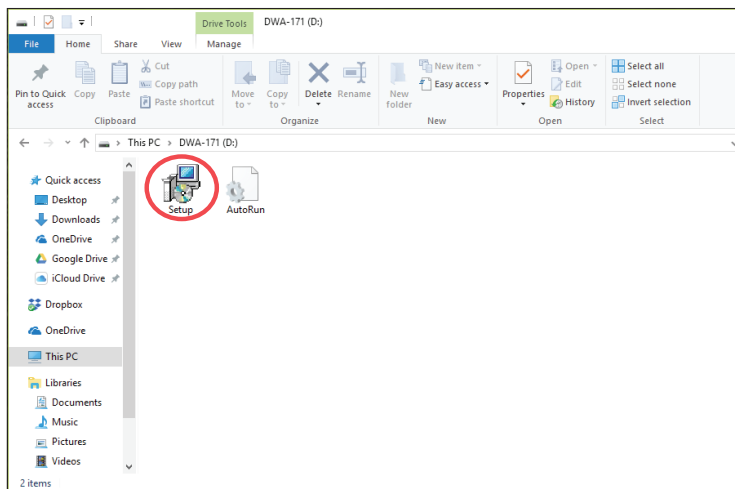

Before installing your new D-Link wireless adapter, please verify the following:

- Remove any previous installations of wireless adapters.
- Disable any built-in wireless and/or Ethernet adapters.
- Verify the settings such as the wireless network name (SSID) and security settings of the network(s) you want to connect to.

# Installation

- 1 Insert the DWA-171 into a USB port on your PC. The setup wizard should start automatically.

**Note:** If the setup wizard does not automatically start, navigate a file manager to the virtual CD-ROM and double-click **Setup.exe**

- 2 Follow the on-screen instructions in the setup wizard.

# Connect to Your Wireless Network

There are two ways to connect to a wireless network:

**A. Wireless Utility** - Connect to your wireless network using the wireless utility method.

**B. WPS Setup** - Use if your wireless router supports WPS (Wi-Fi Protected Setup). Simply press the WPS button on your adapter and your router to automatically configure and connect.

## A. Wireless Utility

- 1 Open your wireless utility and select the network you want to connect to. If the network is secure, you will be prompted to enter the Wi-Fi password.

---

## B. WPS Setup

Connect to your wireless network using the **WPS button setup** method.

- 1 Press the **WPS** button (or launch the WPS process) on your wireless router or access point. Please consult your router or access point's user manual on how to start the WPS process.

- 2 Within two minutes, press the **WPS** button on your DWA-171 adapter.

- 3 Within a minute, your adapter will be securely connected to your wireless network.
