

DCS-1100 Firmware Release Notes

DCS-1100 Revision A Release Notes

=====

Firmware 1.04B7712

Date: 04/30/2013

Release Notes:

- Security Fix:
- Beta Firmware Version 1.04 build 7712
- Security is a priority at D-Link and we have worked with the security community to verify and respond to recent non-trivial, sophisticated security vulnerabilities on some network camera models.
- mydlink-enabled Cloud Cameras will automatically receive an updated firmware when the full release of the firmware becomes available. A full release of the firmware will be available in approximately 30 days.
- We are releasing a Beta firmware with the security patch for customers who want to manually update their cameras immediately.
- Please click the link to the D-Link Forum for the beta version of the firmware with the security patch.

<http://forums.dlink.com/index.php?topic=53733.0>

Release Notes:

- Fix security vulnerability issues from Core Security.
- Enable RTSP authentication as default.

=====

Firmware 1.03

Date: 09/17/2010

Note: When upgrading firmware, make sure you also download the latest Setup Wizard if you need to set up and configure your camera again.
