Camera Setup Options

1. At Home...

Connect to your DCS-800L through your home wireless network.

2. Remotely...

Connect to your DCS-800L using the Internet.

Note: You can also connect directly to your DCS-800L wirelessly, so there is no need for an Internet connection or a router. See the **Advanced Features** section of the User Manual for details. Go to mydlink.com/support to download the DCS-800L User Manual.

A BABY MONITOR FOR THE MODERN PARENT

Installation

WARNING - STRANGULATION HAZARD

Children have **STRANGLED** in cords. Keep adapter cord out of reach of children (minimum of 3 ft or 1m away). **NEVER** place the camera or adapter cord inside the crib or child sleeping area. Do not use extension cords. This product is **NOT** intended to replace proper supervision of children.

1

Download the free **mydlink Baby Camera** app on your smartphone or tablet.

mydlink™ Baby

2

Launch the **mydlink Baby Camera** app.

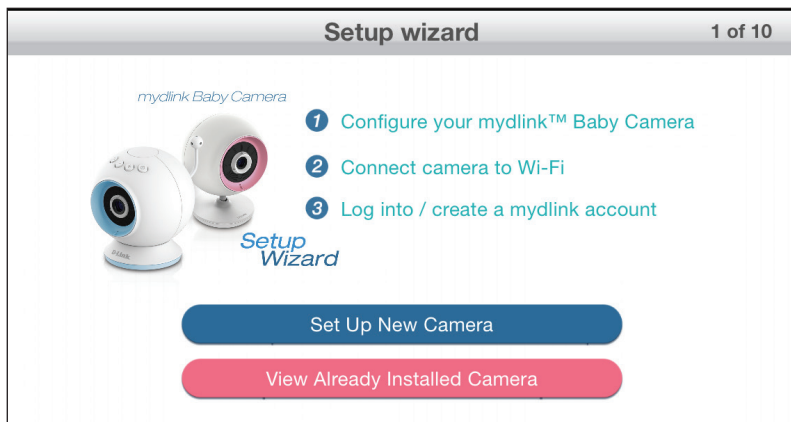

mydlink™ Baby

3

Tap **Setup** on the start screen to launch the *Setup Wizard*. It will guide you through the configuration process.

Mount the Camera

Please refer to the steps below to assist you with mounting the camera.

We suggest that you configure the camera before mounting.

Warning: Indoor use only. Do not mount in a location where it may be in contact with water as it may damage the product and/or cause injury.

Use a 6mm drill bit to drill two holes 36mm apart, and at least 30mm deep.

Then use a mallet to insert the wall anchors into the holes. Screw the included screws into the wall anchors.

Place the mounting holes on the base of the camera over the screws as shown, then slide the camera down to mount the camera.

Make sure the camera is positioned so that the D-Link logo is at the bottom of the base. Adjust the angle of the camera as desired.

FAQs

1. How do I change the accent ring?

Rotate the accent ring counterclockwise, then lift it off. Put the new ring on and rotate it clockwise until it clicks into place.

2. I started the mydlink Baby Camera app, but I can't find my camera.

- Make sure your camera is turned on and receiving power.
- If you have set up your camera before, make sure your smartphone or tablet is connected to the same router as your camera.
- If you are setting up a new camera, or using the camera away from home, make sure your smartphone or tablet is connected to the camera's Wi-Fi signal (not your wireless router).
- The Wi-Fi network name is [myBabyCam-XXXX], where XXXX is the last four digits of your camera's MAC address. (This number can be found on the label on the bottom of your DCS-800L.)
- The Wi-Fi network name and password is printed on a label on the bottom of your camera and on the back of this install guide.
- If you still can't find your camera, reset your camera by pressing its reset button for 10 seconds (while it is powered on).

3. Why is there a white haze when viewing in night vision mode?

The night vision light on the camera may be reflecting off a nearby surface. Try repositioning and aiming the camera.

4. How can you power the camera?

The camera can be powered with the provided power adapter or you can use an external USB battery for total portability. (USB battery is not included. Requires 5V/2A output.)

5. How do I access the camera remotely?

You can set up a new mydlink account and register the camera with mydlink services during the initial setup. Once the process is complete, log in to your mydlink account by tapping the **mydlink Login** button on the Home screen. With mydlink, you can monitor your baby from anywhere as long as your smartphone or tablet is connected to the Internet (over Wi-Fi or over the cellular network).

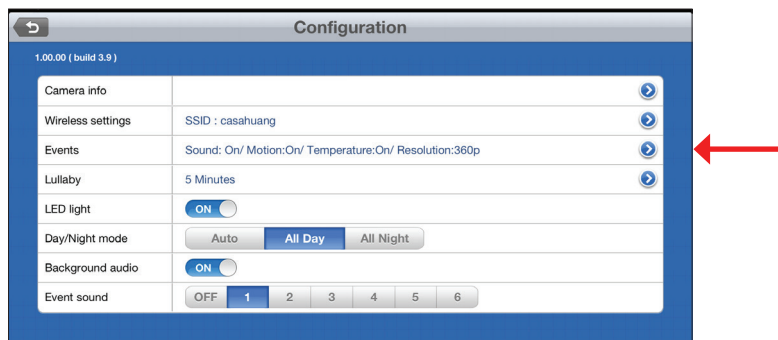

Note: If you don't enable mydlink services, you will only be able to view the camera within your home's wireless coverage area.

6. Should the app be running constantly on my device?

The app can run in the background, allowing you to hear your baby continuously, even when the phone is locked. The smartphone or tablet can still be used normally while the app is running. If you do not want to hear audio from the camera when the app is open, you can turn off the **Background audio** on the *Configuration* menu. If you close the app, the camera audio will be turned off.

7. How do I adjust the sensitivity of motion and audio detection?

From the *Live View* page, tap on the screen to reveal the icons, and tap the **Configuration** icon (⚙️) to go to the *Configuration* menu. Tap the **Events** arrow to access the motion and audio detection settings.

8. What can I do if I forget my password?

If you forget your password, you must reset the camera. Unfortunately, this process will change all your settings back to factory default. To reset the camera, locate the reset button on the back of the camera. With the camera powered on, use an unfolded paper clip to hold the button down for 10 seconds.

9. How do I activate push notifications?

A. Go to the Home page and log in.

B. After logging in, you will notice that the refresh icon on the top right has changed to an alarm clock icon.

C. Tap on the alarm clock icon, and you will see the *Push Notification* setting. Tap on the switch icon to activate push notifications. The switch icon will turn green, and you should begin to receive alerts as specified.

Note: If you do not receive alerts, go to the Configuration menu and adjust the sensitivity level of sound and motion detection as described on the previous page, question 7.
