DCS-G900

- Wireless Video Monitoring and Recording

- Compact in Size for Easy Mounting

- Works with Both PC and Mac® - Take Snapshots Using a Web Browser

- Remotely Manage and View Up To 4 Cameras

SECURICAM™ Network

Wireless G
Internet Camera

D-Link introduces its newest member of the D-Link SECURICAM Network of Internet Cameras: the DCS-G900. A full-featured surveillance camera, the DCS-G900 connects using 802.11g to your existing wireless network. The DCS-G900 features a high quality glass lens and CMOS sensor to capture high-quality MJPEG video.

Controlling your camera is made simple using the included IP View Lite SE Software[1]. IP View Lite SE manages up to four DCS-900 series or DCS-950 series cameras simultaneously. Using IP View Lite SE, you can set your camera to record whenever it detects motion, on a set schedule, or to record manually.

Alternatively, you can view a live feed and take snapshots with any ActiveX® or Java®-enabled web browser, making it ideal for capturing a moment no matter where you are. Web-based camera access works with both PC and Mac®.

By signing up with one of the many free Dynamic DNS services available on the web, you can assign an easy-to-remember web address to the camera. Remotely access your camera without having to remember the IP address, even if your Internet Service Provider changes it.

The DCS-G900 adheres to the Universal Plug & Play (UPnP™) specification which allows computers running Windows® XP to recognize the DCS-G900 and automatically add it to the network. The DCS-G900 can be accessed and viewed from "My Network Places" as a device on the network.

Everything you need to get started is included with the DCS-G900. The stand for the DCS-G900 also doubles as a wall mount, so you can place the compact DCS-G900 in a variety of locations. Once installed, an easy to use setup wizard simplifies the initial setup of the DCS-G900.

Whether you are creating your first network of wireless cameras, or adding to your existing surveillance setup, the DCS-G900 is the sound choice. The DCS-G900 is a cost-effective and versatile security solution for your home or business.

SPECIFICATIONS

Remote Management
- Configuration Accessible via Web Browser

Networking Protocols
TCP/IP, HTTP, SMTP, DHCP, FTP, Telnet, NTP, DNS, DDNS, UPnP™, BOOTP and PPPoE Support

Connectivity
- 802.11g Wireless
- Wireless LAN Site Survey
- 10/100Mbps Fast Ethernet
- Auto Negotiation
- Auto MDI/MDI-X

Video Algorithm Supported
- MJPEG

Video Resolution
- Up to 30fps at 160x120
- Up to 25fps at 320x240
- Up to 10fps at 640x480

Camera Specification
- ¼" CMOS Sensor
- 2.5 Lux @ F1.4
- AGC/AE/AWB
- Electronic Shutter: 1/60~1/15000 sec.
- Standard Board Mount Type Lens: 4mm, F2.0

Security
- WEP (64/128-bit)
- WPA-PSK and TKIP
- Administrator and User Group Protected
- Password Authentication

[1] For Windows® only

IP View Lite SE Management Software
- Remotely Manage and Control up to 4 DCS-G900 Internet Cameras
- View up to 4 Cameras on One Screen
- Supports all Management Functions Provided in Web Interface
- Scheduled, Motion Triggered, or Manual Recording Options

Viewing System Protocol Requirement
- ActiveX®
- Java®

Operating System
- Microsoft Windows® XP/2000

Temprature
- Operating: 32˚F - 104˚F
- Storage: -13˚F - 122˚F

Humidity
5% - 95% (non-condensing)

LEDs
- Power
- Link

Power
- External Power Supply: 5V DC 2.5A
- Power Consumption: 4.5W

Dimensions
- 2.5" (L) x 2.5" (W) x 2.75" (H)

Weight
- 9.6oz.

Warranty
- 1-Year

View Streaming Video from Anywhere in the World

The DCS-G900 is a cost-effective compact surveillance camera, delivering high quality MJPEG video, and unrivaled versatility in placement. Create or expand your video monitoring network with the DCS-G900 Internet Camera.
