MainStage™ TV Adapter for Intel® Wireless Display

Designed for laptops with Intel® Wireless Display

Surf the web on the TV from your couch, your TV displays what your laptop sees

Enjoy a home theater experience with 1080p and 5.1 digital surround sound[3]

Make surfing the Web a part of your Home Theater Experience on your HDTV

Instead of crowding around a desk with all your friends just to show them this really funny video you saw on YouTube the other day, wouldn't it be better if all of you sat comfortably on the couch to watch that same video, but on your big screen TV, with popcorn? Watch movies from Netflix or shows from Hulu. Listen to Internet radio using Pandroa or just blast 5.1 surround sound from a Blu-Ray movie[3].

One Button Connection

The D-Link MainStage can do just that. It acts as a bigger, better, HD display for your Intel® Wireless Display powered laptop. It wirelessly 'sends' your laptop[2] display onto your TV, enabling you to surf the web, view home movies from your home network, or your laptop[2], right from the couch, with the push of a button.
Two Screens at Once

Drag a movie onto the Windows extended screen to watch on your TV, and continue using your laptop to chat, email, and work on a document.

Great for Presentations

The MainStage is also great for presentations, grab your Intel WiDi enabled laptop and 'send' your colorful and animated presentations onto your business flat-panel equipped conference room with the push of a button.

DHD-131

D-Link®

Features

+ Quick and easy secure setup
+ Surf the web from your couch
