

DSB-R100 USB PC Radio

Listen to your Favorite FM Radio Program or your Style of Music while you work on your PC

Now you can listen to your favorite FM radio program or your style of music while you work on your PC. The D-Link DSB-R100 plugs into any Windows 98 PC through the USB port to deliver FM radio broadcasts through your computer's sound system in stereo.

We even included software that allows you to record your favorite programs or music to the MP3 format for playback whenever you want. State of the Art radio technology with leading edge custom channel presets and digital sound brings a new level of FM broadcasts directly to you on your computer.

Displayed in a space aged sleek case, it has a flexible and detachable antenna. The D-Link DSB-R100 takes very little desk-space and is easily transported. It draws its power from your computer's USB port, so it works great with laptops too.

When you choose D-Link, you can be sure that you have made the right choice. That's because D-Link is one of the largest connectivity products manufacturers in the world.

The D-Link DSB-R100 USB PC Radio is a stereo FM band (no AM) radio receiver with a USB interface. The PC Radio will easily install on any Windows 98 due to the USB interface. The DSB-R100 consists of the radio unit with an adjustable antenna and connecting cables that plug into a USB port and the line-in on the PC's sound card.

The DSB-R100 provides the user with the ability to listen to their favorite radio programs or music right from their PC. The Radio is powered off of the USB bus so no external power supply is needed. The Radio works just as easy as a car stereo and up to 200 stations can be preset. The software can record music or programs from the radio that can be saved in the MP3 format. The software also has an available "Sleep" and "Wake" function that allows the user to record radio programs while away from their PC.

The DSB-R100 provides the user with the ability to listen to their favorite radio programs or music right from their PC
