- Plug and Play, For Windows XP, Me (UPnP™) and Mac OS X (Rendezvous™)
- No Direct Connection to a Computer Necessary
- Share Stored Media Content Throughout Your Home Network

MediaLounge™
Entertainment Network

Central Home Drive

D-Link, a leader in the networking industry, introduces the MediaLounge™ DSM-600 Series of Central Home Drive devices. The 20GB DSM-602H and the 40GB DSM-604H are portable and removable external Fast Ethernet hard disk drives. Connect one directly to a PC for additional personal storage space or add it to a local area network so that everyone on the network can access the drive.

The Central Home Drive provides a fast and easy way to add high-performance storage to your digital home, school or small business network. These devices are ideal for storing digital photos, movies, music, or other files.

The Central Home Drive features both UPnP™ (for devices running Windows XP and Me) and Rendezvous™ (for Mac OS X or Linux systems). Since the drive is immediately visible and available to everyone on the network, you can

use it to share files or collaborate on projects. The Central Home Drive are also hot-swappable so you can connect and disconnect them from a network at any time.

The Central Home Drive adheres to the Universal Plug & Play AV (UPnP AV) specification, allowing it to communicate seamlessly with other UPnP AV media devices.

The Fast Ethernet port on the device is Auto MDI/MDI-X, accepting both straight-through and crossover Ethernet cables for high-speed network connectivity. Stream music and videos in virtually real-time or instantly retrieve files from the Central Home Drive.

The MediaLounge DSM-600 Series provides added convenience for networking as a simple and speedy storage solution.
